

BEANBAG TOSS

Perfect for impromptu tailgating! We suggest placing canned food or other sturdy weights at the top corners of the box when you're ready to play; this will help stabilize the box.

SUPPLIES

Large corrugated cardboard box
Ruler or yard stick
Pencil
Utility knife

INSTRUCTIONS

1

Lay the box on its long side. Using a ruler or yard stick and pencil, draw a diagonal line between two opposite corners.

2

Turn the box over and draw the same line on the other side, but on a reverse angle.

3

Use a utility knife to carefully cut along the diagonal lines on the sides of the box. (Adults only for this part!) Cut along the top and bottom corners.

4

Separate the two halves of the box. Each half is now shaped like a ramp. Flip one "ramp" over.

5

Draw a beanbag hole on the main surface, then use a utility knife to carefully cut out the hole.

6

Remove the cardboard cutout.

7

Play
